

Create Your Own Social Media – html code

STEP 1: Copy and paste the html code below to your web page.

```
<p>
<center><script type="text/javascript">

(function() {

    var d = document,
        l = d.location,
        e = encodeURIComponent,
        u = e(l.href),
        t = e(d.title);

    // implied global
    socializelt = function(wher)
    {
        var url;
        if (wher == 'Buzz')
        {
            url = 'http://buzz.yahoo.com/submit?submitUrl='+ u +'&t=' + t;
        }
        else if (wher == 'del.icio.us')
        {
            url = 'http://del.icio.us/post?v=4&noui&jump=close&url=' + u + '&title=' + t;
        }
        else if (wher == 'Facebook')
        {
            url = 'http://www.facebook.com/share.php?u='+ u +'&t=' + t;
        }
        else if (wher == 'Google')
        {
            url =
'http://www.google.com/ig/adde?moduleurl=www.google.com/ig/modules/bookmarks.
xml&hl=en/u='+ u +'&t=' + t;
        }
        else if (wher == 'Myspace')
        {
            url = 'http://www.myspace.com/Modules/PostTo/Pages/?u='+ u +'&t=' + t;
        }
        else if (wher == 'StumbleUpon')
        {
```

```

        url = 'http://www.stumbleupon.com/submit?url=' + u + '&title=' + t;
    }
    else if (where == 'Technorati')
    {
        url = 'http://technorati.com/faves/?add=' + u;
    }
    else
    {
        throw new Error ('unknown social site "' + where + '"');
    }
    window.open(url, 'sharer',
'toolbar=0,status=0,width=700,height=500,resizable=yes,scrollbars=yes');
    return false;
};

```

```

var sites = ['Google', 'Buzz', 'Facebook', 'Myspace', 'StumbleUpon', 'Technorati',
'del.icio.us'];

```

// Note that the number of elements and order of the array of images must match that of the sites array above.

```

var imgURLs = new Array();
var iLen = sites.length;
var i;

```

```

for(i = 0; i < iLen; i++)
{
    imgURLs[i] = 'http://www.your-own-website.com/objects/';
}

```

```

//Google
imgURLs[0] += 'google.gif';

```

```

//Yahoo Buzz
imgURLs[1] += 'yahoobuzz1.gif';

```

```

//Facebook
imgURLs[2] += 'Facebook.jpg';

```

```

//Myspace
imgURLs[3] += 'myspace.gif';

```

```

//StumbleUpon Image
imgURLs[4] += 'StumbleUpon.jpg';

```

```

//Technorati Image
imgURLs[5] += 'Technorati.jpg';

//Delicious Image
imgURLs[6] += 'del.jpg';

document.writeln('<br clear="all"><hr><table><tbody><tr><td rowspan="2"
nowrap><strong>Share this page:&nbsp;</strong><br><span style="font-
size:11px;"><a href="#" onclick="window.open(\'http://www.your-own-
website.com/help/whats-this.html\',
\'sharer\',\'toolbar=0,status=0,width=700,height=500,resizable=yes,scrollbars=yes\');
return false;">What\'s This?</a></span></td>');

for (i=0; i<4; i++)
{
var site = sites[i];
var imgURL = imgURLs[i];

document.writeln('<td><a href="#share_on_'+site+'" onClick="return
socializelt(\''+site+'\');"></a></td>');
}
document.writeln('</tr><tr>');
for (i=4; i<iLen; i++)
{
var site = sites[i];
var imgURL = imgURLs[i];

document.writeln('<td><a href="#share_on_'+site+'" onClick="return
socializelt(\''+site+'\');"></a></td>');
}

document.writeln('</tr></tbody></table>');
})();

</script></center>
<hr>
</p>

```

STEP 2: Change URL's to your URL's. In the code above, there are two URL's that need to be changed.

STEP 3: Create a new folder and call it "objects." Or you can simply use your image folder.

STEP 4: Now, right click on the "share this page" images. Save the images one by one to your "objects" folder or your "image" folder.

STEP 5: Create another folder on your website and name it "help".

STEP 6: Create a new web page and name it "whats-this.html".

STEP 7: Copy and paste the following html code into "whats-this.html".

```
<body bgcolor="#FFFFFF" onLoad="window.resizeTo(550,625)">
```

```
<table width="400" border="0" align="center" cellpadding="4" cellspacing="0" bgcolor="#000066">
```

```
<tr>
```

```
<td>
```

```
<table width="400" border="0" align="center" cellpadding="8" cellspacing="0" bordercolor="#000066" bgcolor="#EEEEEE">
```

```
<tr>
```

```
<td>
```

```
<div align="center"><font face="Verdana, Arial, Helvetica, sans-serif" size="1"><a href="#"
```

```
onclick="window.close()">Close Window</a></font></div>
```

```
<h3 align="center">What Are Social Media?</h3>
```

```
<p><strong>And what do these buttons do?</strong></p>
```

```
<p>Social media let you use the Web to interact with others. This could be through social <em>networking</em> sites
```

```
like Facebook or MySpace, where you can visit with friends and acquaintances. Or it could be through social
```

```
<em>bookmarking</em> services, like StumbleUpon, Yahoo! Buzz and Delicious, where you bookmark Web pages you like and
```

```
share them with other users of the same service.</p>
```

```
<p>Social media also let you tailor the Web to suit the way <em>you</em> prefer to use it. Some of the ways you can
```

```
tailor it include...</p>
```

```
<ul>
```

```
<li><p>tagging the content you like, so that you (and others) can quickly find it with particular tags (keywords)</p></li>
<li><p>saving it for later reading</p></li>
<li><p>contributing to the Web by making thoughtful comments or easily creating short pages about your favorite topic.</p></li>
</ul>
```

```
<p>These buttons let you easily share the Web page you just read on <strong>www.your-own-website.com</strong> by adding it to your favorite social media tool. How? Simply click on its button on the page. There's nothing to download or install.</p>
```

```
<p>If you're not yet using any of these social media, you can set up one after clicking on its button. Once your account is up and running, you'll be able to share the Web page with friends and family, or save it for later reading.</p>
```

```
<p>Of course, you're not limited to the buttons you see here. You can use any of these popular social media, or add a Web page from <strong>www.your-own-website.com</strong> to the service you already use.</p>
```

```
<p align="center">
<font face="Verdana, Arial, Helvetica, sans-serif" size="1"><a href="#"
onclick="window.close()">Close
Window</a></font>
</p>
</td>
</tr>
```

```
</table>
</td>
</tr>
</table>
</body>
```

STEP 8: Change the two URL's in the above html code to your URL's.

When you finish these 8 steps, your web page should look like this...

Share this page:

[What's This?](#)
